MINISTRY OF SCIENCE AND EDUCATION OF THE REPUBLIC OF AZERBAIJAN

KARABAKH UNIVERSITY

Faculty of Mathematics & IT— Computer Engineering

Course: Introduction to Python Programming

Laboratory Assignment No: 1

Topic: Conditional Statements and Decision-Making in Python

Student Name: Ibrahim Aliyev

Group: KOM26

Instructor: Shamil Humbatov

Date: October 14, 2026

---

1. OBJECTIVE

- To learn and use conditional statements (if, elif, else) in Python

- To create basic decision-making algorithms

- To practice logical operators and user interaction

2. TASKS AND RESULTS

Task 1. Body Mass Index (BMI) Calculator

- Description: The program asks the user for weight (kg) and height (m). It calculates the BMI and shows the weight category.

- Test Result:

```
Enter weight: 78
Enter height: 1.75
BMI: 25.46938775510204
Category: Overweight
Do you want calculate again? (y/n):
```

Task 2. Chinese Zodiac Calculator

- Description: The program asks for the birth year. It calculates the Chinese Zodiac animal using year % 12.

- Test Result:

```
Enter your year: 2008
Your Chinese Zodiac sign is: Rat
Do you want check your Chinese Zodiac sign? (y/n):
```

Task 3. Birthday Guessing Game

- Description: The program shows five sets of numbers. The user answers 1 for Yes and 0 for No. The program calculates the birth day from the user's answers

- Test Result:

```
Is your birthday in Set1?
 1  3  5  7
 9 11 13 15
17 19 21 23
25 27 29 31
Enter 0 for No and 1 for Yes: 0

Is your birthday in Set2?
 2  3  6  7
10 11 14 15
18 19 22 23
26 27 30 31
Enter 0 for No and 1 for Yes: 1

Is your birthday in Set3?
 4  5  6  7
12 13 14 15
20 21 22 23
28 29 30 31
Enter 0 for No and 1 for Yes: 0

Is your birthday in Set4?
 8  9 10 11
12 13 14 15
24 25 26 27
28 29 30 31
Enter 0 for No and 1 for Yes: 0

Is your birthday in Set5?
16 17 18 19
20 21 22 23
24 25 26 27
28 29 30 31
Enter 0 for No and 1 for Yes: 1

Your birthday is: 18
Do you want to gues your birthday? (y/n):
```

3. CONCLUSION

In this assignment, I practiced using conditional statements in Python. I successfully created programs to calculate BMI, find the Chinese Zodiac sign, and guess birthdays using user inputs.
